

Name: 

BLOCK :

JANUARY 2012

ASSIGNMENT:

You will be observing the night sky for the month of January.

Each night, (at approximately the same time and place) find the moon and record where it is in the sky. Draw what shape it is. You could also record any other observations such as: "Cloudy, ring around the moon, found big dipper constellation, Orion the Hunter is visible, Venus is visible, etc.

You will be asked to describe and predict the phases of the moon at the end of the month.

Happy Skywatching! ☺
